## Product Description

### Product Description

GE FANUC IC695CPE400 RX3i CPE400 Controller Module 1.2 GHz

### Technical Application

The PACSystems™ RX3i CPE400 is the industry's first outcome optimizing controller. It augments real-time deterministic control with Field Agent technology, delivering near real time advice through market analysis, fleet and enterprise data, or asset/process knowledge to optimize the outcomes that today's businesses require. The Predix™ enabled CPE400 provides reliable, secure communication and analytics using either cloud-based or edge-based outcome optimizing apps. Controls can now be programmed to dynamically influence business outcomes, generate
new forms of revenue, and improve profitability.
• The ETH port can be configured with a static IP address or use DHCP.
• The Virtual Network Interface between Linux and the PACEngine allows Linux to access the PACS OPC UA server without using the external network.
• Python script allows Web interface to connect to PACEngine OPC UA server.
• Python script allows browsing of OPC UA tag space.
• Python script allows Get/Set of tag data.
• Python script allows Get and Store of tag data in a sample sqlite database.
• Install standard Ubuntu Linux packages to create fully custom applications.
• Factory Reset allows the user to restore Linux to its original state, with the exception of the /home directory.
