Product Description

Product Description

FOXBORO FBM239 P0927AG DCS Digital 16DI/16DO Module

The Compact FBM239 contains 16 discrete input and 16 discrete output channels that are compatible with voltages and currents commonly found in industrial plants. An external power supply is used to energize the field circuits. The Compact FBM239 Discrete 16DI/16DO Module provides 16 digital inputs with sixteen digital output channels. Associated Termination Assemblies (TAs) provide for discrete nominal inputs of 30 V dc, 60 V dc, 120 V ac/125 V dc or 240 V ac and nominal outputs of 60 V dc, 120 V ac/125 V dc or 240 V ac. The module performs signal conversion required to interface the electrical input signals from the field sensors to the Module Fieldbus. Depending on the type of I/O signal required, the TAs support current limiting devices, high voltage attenuation circuits, optical isolation and external power source connections.

Technical Application
